SUMMARY

Design-focused Frontend Developer & Design Engineer with expert command of UI/UX. Specializes in bridging the gap between creative vision and engineering by translating complex Figma designs into pixel-perfect, accessible Next.js applications. Passionate about performance, component architecture, and delivering polished, interactive user experiences.

PROJECTS

TaskBoard | *React, TypeScript, Next.js, Tailwind, Supabase, Prisma* — Live | GitHub
- Developed a high-performance tasks tracker leveraging Server Components for reduced bundle size. Secured app with Better-Auth and Zod validation. Enhanced user experience with URL-based state management (NUQS) and React Query.

Kynto | *React, TypeScript, Next.js, Tailwind, Motion* — Live | GitHub | Figma
- Designed and developed a pixel-perfect landing page for Kynto, a global HR and payroll platform. Features a highly responsive layout with complex scroll-driven animations, interactive 3D card flips, and a dynamic dashboard preview. Built a custom design system using Next.js, TypeScript, and Tailwind CSS, with Motion for premium visual effects.

Arken | *React, TypeScript, Next.js, Tailwind, Motion* — Live | GitHub | Figma
- Designed and developed a responsive website for a modular architecture company, featuring smooth, scroll-driven animations using Motion for React.

ChefGPT | *React, TypeScript, Next.js, Tailwind, Motion* — Live | GitHub
- Built an AI-powered culinary assistant to generate recipes from available ingredients. Designed the interface in Figma and executed a pixel-perfect implementation. Implemented an intelligent chat assistant using Server Actions.

EXPERIENCE

Freelance Frontend Developer — Oct. 2025 – Present
Remote — *Remote*
- **Architect High-Fidelity Interfaces:** Transform static Figma concepts into responsive, interactive web applications using Next.js and Tailwind CSS, ensuring 100% pixel perfection across devices.
- **Engineer Complex Interactions:** Implement advanced, scroll-driven animations and micro-interactions using Motion (Framer Motion) to enhance user engagement without compromising performance.
- **Modern State Management:** Build robust, type-safe application logic using React Server Actions, Zod validation, and URL-based state (Nuqs) for shareable, bookmarkable user flows.

Freelance Visual & Marketing Graphic Designer — Jan. 2018 – Present
Remote — *Remote*
- **Design High-Conversion Assets:** Created premium marketing visuals, hero sections, and social media campaigns for remote fintech and startup clients, directly supporting product launches and user acquisition.
- **Data Visualization:** Translated complex technical data into clear, engaging infographics and visual systems, simplifying high-level concepts for broad audiences.
- **Technical Design Handoff:** Collaborated with engineering teams to prepare production-ready asset kits (optimized SVG/WebP) and detailed documentation, ensuring design feasibility and faster development cycles.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, HTML5, CSS3
Frontend Libraries: Tailwind CSS, Motion, shadcn-UI, Radix-UI, TanStack Query, Zod, nuqs
Backend & Database: Node.js, Express, PostgreSQL, SQL, Supabase, Neon, Drizzle ORM, Prisma, Better Auth
AI & Tools: Cursor, Claude Code, Antigravity, VS Code, Git, GitHub, Vercel, Netlify
Design: Figma, Framer, Adobe Illustrator, Adobe Photoshop, Adobe After Effects

CERTIFICATIONS & LEARNING

Scrimba | The Fullstack Developer Path Certificate   **Frontend Masters** | Intermediate React, Fullstack Next.js Apps
Udacity | Advanced Data Analysis & Data Analysis Professional

EDUCATION

Master of Mechanical Engineering (Power) — Laghouat, Algeria
Amar Telidji University — *July 2017*

Bachelor of Mechanical Engineering (Power) — Laghouat, Algeria
Amar Telidji University — *July 2015*
